Delivery & Promotional BOTS:

The Butler BOT

The **Butler Bot** is designed to deliver a premium, hands-free service experience. With its elegant design and multi-functional trays, it operates like a reliable digital butler, assisting staff with effortless item delivery and collection.

- **Large load capacity** for transporting meals, drinks, or supplies
- **Intelligent route planning** for smooth and efficient service
- **Interactive design** with voice and touch features for user-friendly operation

Ideal for hotels, restaurants, aged care, and event venues, the butler bot elevates service quality while freeing staff to focus on **hospitality, care, and connection**.

The delivery and promotional BOT:

This is a compact, intelligent service robot designed to make everyday operations smoother and more efficient. With its **multi-tray design** and **precise navigation system**, the BOT delivers food, drinks, or items seamlessly across busy environments and also runs campaigns.

- **Easy to set up and operate** – ready to work in minutes
- **Lightweight and versatile** – perfect for restaurants, cafés, aged care, and offices
- **Improves customer experience** by freeing staff to focus on connection and service

Springle Robotics brings tis BOT to Australian businesses as an **affordable, reliable solution** for tackling staff shortages while enhancing guest satisfaction.

Simply Delivery BOT:

The BOT is a sleek, agile service robot built to navigate tight spaces with ease. Compact yet powerful, it delivers meals, drinks, and items efficiently while maintaining a smooth and stable service experience.

- **Slim design** – ideal for narrow aisles and crowded venues
- **Stable delivery** with shock-absorbing trays
- **Smart obstacle avoidance** for safe navigation in busy spaces

Perfect for cafés, restaurants, and small venues, the delivery helps reduce staff workload and ensures a **faster, more enjoyable customer experience**.

The Cleaning BOTS:

AI-Powered Scrubber Cleaning Robot:

This AI powered BOT is a next-generation cleaning robot built for large commercial and public spaces. Combining **autonomous navigation** with **powerful cleaning functions**, it ensures spotless, hygienic environments with minimal human effort.

- **Multi-function cleaning** – sweeping, vacuuming, and mopping in one unit

- **Advanced obstacle detection** for safe, smooth operation
- **Long battery life** for extended cleaning sessions
- **Smart scheduling** to work around business hours
- **5,000m²** per charge

Perfect for shopping centres, offices, airports, and hospitals, the BOT delivers **consistent cleanliness and efficiency**, reducing costs while maintaining a welcoming environment.

AI-Powered Spot Cleaner, Sweeper & Vacuum Robot:

This BOT is an advanced AI-driven cleaning robot designed for precise spot cleaning and intelligent floor care. With its powerful suction, sweeping capability, and autonomous navigation, it delivers spotless results in high-traffic environments.

- **3-in-1 cleaning** – spot cleaning, sweeping, and vacuuming
- **AI-powered path planning** for efficient, targeted performance
- **Compact and agile** – ideal for tight or busy spaces
- **Quiet operation** to minimize disruption in workplaces and public venues
- **8000m²** per charge

Perfect for offices, retail spaces, hotels, libraries and healthcare facilities, the BOT ensures clean, safe, and welcoming spaces while reducing manual workload.

Compact Everyday Maintenance Robots (All-In-One & Vacuum Only) :

This BOT delivers fast, autonomous floor care for busy indoor spaces. It **sweeps, vacuums, and dust-mops** with a **61 cm cleaning width**, covering **up to 2,500 m² on a full charge**. Use **dual operation modes**

- **3-in-1 cleaning:** sweeping, vacuuming, dust mopping.
- **Coverage:** up to **2,500 m²/charge**; **~600 m²/h** efficiency.
- **Battery life:** up to **6 h** (sweep/vac) or **10 h** (dust-mop); **5–6 h** charge time.
- **Controls:** **extendable handle** + **remote tasking** in the KEENON App.
- **Power:** up to **19,000 Pa** suction for debris pickup.

Handheld Scrubber & Dryer:

This BOT is a powerful and versatile handheld floor-cleaning robot designed for quick, effective maintenance in high-traffic areas. Combining scrubbing and drying functions in one compact unit, it ensures spotless, slip-free floors with minimal effort.

- **2-in-1 cleaning** – scrubs tough stains and dries instantly

- **Ergonomic handheld design** for comfort and easy maneuverability
- **Strong suction and water recovery** for streak-free floors
- **Compact & flexible** – ideal for corners, edges, and small spaces

Perfect for restaurants, hotels, offices, and public venues, the BOT delivers professional-grade cleaning in a lightweight, user-friendly design that saves both time and labour.
